DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 and 11, drawn to a corrosion resistant member.

Group II, claim(s) 8-10, drawn to a process for producing a corrosion resistant member.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The technical feature of a substrate with a corrosion resistant aluminosilicate or zirconia silicate glass coating containing at least one element from a group consisting of group 2a, group 3a or group 4a elements of the periodic table does not provide a contribution over the prior art because it is disclosed by U.S. Patent 5,118,581 to Shalaby. Shalaby discloses an aluminosilicate glass coating on the surface of a specimen (column 1 lines 60-64) to minimize oxidation of the specimen (column 2 lines 3-4).

During a telephone conversation with Mark Boland on November 29, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-7 and 11.

Art Unit: 1775

During a telephone conversation with Mark Boland on November 29, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-7 and 11.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 8-10 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,118,581 to Shalaby et al.

Regarding claim 1, Shalaby discloses an aluminosilicate glass coating on the surface of a specimen (column 1 lines 60-64) to minimize oxidation of the specimen (column 2 lines 3-4).

Art Unit: 1775

Shalaby discloses the inclusion of Mg and Ca, both 2a elements in the glass coating (column 2 lines 30-49).

Regarding claim 7, Shalaby discloses airbrushing the coating, which is spraying. A chemical composition and its properties are inseparable. In re Spada, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 *MPEP 2112.01*. Because the prior art exemplifies the applicant's claimed composition and application method in relation to the coating, the claimed physical property relating to the surface roughness is inherently present in the prior art. Absent an objective evidentiary showing to the contrary, the addition of the claimed physical property to the claim language fails to provide patentable distinction over the prior art.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,633,090 to Rodek et al.

Regarding claim 1, Rodek discloses an aluminosilicate glass coating on a glass or glass ceramic substrate, said coating containing Mg and Ca both group 2a elements (abstract and column 3 line 58-column 4 line 10).

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,864,459 to Lu et al. Lu discloses a stainless steel substrate with an aluminosilicate glass coating containing Mg (column 7 lines 5-10, 20-25 and 47-56).

Allowable Subject Matter

Claims 2-6 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
